

ABHINAV Kumar Singh

Aspiring Software Developer

About Me

I am currently a Third-year Diploma student (6th Semester) in Computer Science, eager to learn and grow in the field of technology. I have knowledge of Python, C, Java, and JavaScript. Skilled in PowerPoint, Word, Excel, Canva, and basic video editing. I am eager to apply my skills and gain valuable practical experience.

Skills:

Programming Languages:

Python, C, Java, JavaScript

MS Office Tools:

Word, PowerPoint, Excel

Design & Creative:

Canva, Basic Video Editing

AI & APIs:

Gemini API, Groq LLaMA,
OpenWeather API, NLP

Frameworks & DB:

Flask, Streamlit, MySQL

Other Skills:

Problem Solving, Logical Thinking

Operating System:

Windows

Education:

Diploma – CS & Engineering

Regent Institute of Science
and Technology
2022 – Present | 6th Semester

12th: Morning Bells Academy – 63%

10th: Morning Bells Academy – 78%

Language:

6291472603

Kolkata, West Bengal, India

Project & Technical Skills

Mentor AI

- Cloud-based AI mentoring platform providing personalized, real-time guidance to students and professionals.
- Dual AI: Google Gemini 1.5 Flash (primary) + Groq LLaMA 3.1 8B Instant (fallback) for high availability.
- OTP-based email verification, bcrypt password hashing, MySQL database; deployed on Render cloud.
- Includes Pomodoro Study Timer, Analog Clock, Notepad; fully responsive Python (Flask) + HTML/CSS/JS app.

AIRA – AI Based Virtual Assistant

- Voice-controlled Python assistant using SpeechRecognition + pyttsx3 for natural human-computer interaction.
- Automates tasks: opens apps, searches the web, plays music, and tells time/date via voice commands.
- Pipeline: Voice Input → Speech Recognition → Python Processing → Task Execution → Voice Response.

Tune Together

- Real-time collaborative music app — host controls playback via shared room code, all friends sync instantly.
- Live group chat feature; fully responsive and mobile-compatible, works on all devices.
- Built with HTML, CSS, and JavaScript with real-time audio synchronization.

Weather Bot

- Chatbot with real-time weather updates and visual icons; integrated OpenWeatherMap API for live data.
- Emotion-driven responses — reacts warmly on cold days, expresses discomfort on hot days.
- Built with Python (Flask/Streamlit) + JavaScript frontend for an engaging conversational experience.

Extra Curricular Activities

Certificate in Computer Application (6 Months)

NBCE Skill Development (2022)

Topics: Computer Fundamentals, Operating System, MS Office (Word, Excel, PowerPoint)
